Dear Colleagues,

We are very pleased to announce that the Heart Failure 2014 Congress of the Heart Failure Association of the European Society of Cardiology will be organised in Athens, Greece from 17th to 20<sup>th</sup> of May 2014.

The Heart Failure Congress of the HFA is the world's largest heart failure meeting with an exciting and innovative scientific programme. The upcoming meeting will offer you great opportunities to see the latest advances and the new directions from the prevention to device therapies in heart failure. Moreover, this congress is the perfect platform to meet other experts and colleagues to discuss your research.

You are invited to actively participate in our congress, either by submitting your late breaking trials until Wednesday 1 April (link [here](#)) or by attending to the congress (link [here](#)).

New This year: Your registration includes also a free access to the World Congress on Acute Heart Failure to be held during the HF2014 Congress and CPR Workshops sessions! More information [here](#).

Athens, the city of the congress, is a very attractive and affordable city and the venue is ideally located in the heart of the city centre. In the context of the excellent collaboration between HFA and The Japanese Circulation Society, active participation and representation of JCS is very important to us. It will be a great opportunity to show the scientific potential of JCS in the field of heart failure.

We hope to meet and welcome you to Heart Failure 2014 in Athens,

Best regards,

Prof. Gerasimos Filippatos, FESC

HFA President-Elect,  
Heart Failure 2014 Scientific Chairman
